PROJECTS

CONTENT-SHARING PLATFORM

- Built a full-stack content sharing platform using React.js, Node.js, Express.js, and MongoDB following the MERN architecture.
- Implemented JWT authentication and protected routes to ensure secure user login and access control.
- Developed RESTful APIs for creating, updating, deleting, and retrieving posts with image and video uploads.
- Designed a responsive UI with React and Tailwind CSS, implementing dynamic feed and like functionality.

TOURNAMENT MANAGEMENT REST API

- Developed a scalable backend API for managing tournaments, teams, and match data using Node.js, Express.js, and MongoDB.
- Designed RESTful CRUD endpoints with proper HTTP methods and structured API responses.
- Implemented MVC architecture with modular controllers and routes for better maintainability and scalability.
- Modeled data using Mongoose schemas and optimized database queries, testing endpoints using Postman.
